|   | Problem P(7=3/x= 20)                    |
|---|---|
|   | with KNN K=1 we have 0% training error  |
| 4 | So test ervor itself = 36%              |
|   | Test ever for logistic Regression = 36% |
|   | hence we shook Logistic Regression in   |
|   | this come.                              |
|   |   |
